

The Township of South Stormont is pleased to announce our new **FIRE EXTINGUISHER TRAINING PROGRAM** available to the public.

This program is designed to teach the basics of fire extinguishers and their proper use. We will start with a classroom portion which will include fire extinguisher design, ratings, sizing and components. Next, we will move outdoors where our training simulator will be used by each participant. South Stormont uses the BullEx Xtreme I.T.S. training system. This system uses a propane powered training prop which can be equipped with different attachments to simulate various types of fires, from small garbage can fires to more difficult electrical fires and kitchen fires. The use of this prop is a safer alternative than using potentially harmful chemicals and costly refills of fire extinguishers.

We would like class sizes be limited to 10-20 persons, but we can accommodate larger groups, if requested. Class duration will be approximately 1–1.5 hours.

Cost: \$80 per class

If your organization wishes to take part in this program, please contact our Fire Prevention / Public Education Officer, Nick MacGillivray, at nick@southstormont.ca
