

Canvas Art

SUPPLIES THAT WE HAVE PROVIDED

- Canvas
- Tape
- Acrylic Paint
- Paint Brushes
- Sponge

INSTRUCTIONS

1. Begin by brainstorming the design you'd like to create. You will be using the tape to form borders/boundaries of where you would like your paint.
2. Press the tape down quite well in the shape/form of your desired design. You want to avoid the paint leaking underneath so it is important to pay careful attention to detail in this step.
3. Apply the paint directly to the canvas and spread it out using your brush (creates smooth surface) or the sponge (to create a textured surface).
4. Be sure that your paint is mostly dry before peeling the tape away.
5. If it is too wet or too much, it will leak into the border you've created with the tape. If you wait until it is completely dry, you may crack and lift any paint that may be stuck to the tape.
