# Township of South Stormont Triage BR+E

---

## Background

The Township of South Stormont has undertaken a number of economic development initiatives to further understand and engage with the business community. Business retention and expansion (BR+E) activities can be employed to ensure business needs are monitored and addressed; however, engagement can be time consuming and complex.

A Triage BR+E Survey was commissioned by South Stormont to engage businesses and report on observations generalizable to the broader business community, while also allowing for the identification of individual potential expansion or retention opportunities, which staff can follow-up on business-by-business.

## Methodology

- A random sample telephone survey was conducted in August of 2019. The project targeted 80 survey completions and was successful out of an initial sample of 430 businesses. This rigorous approach resulted in a response rate of 18.6% which is extremely high in the market research industry where response rates average in the 1%-2% range.
- This scientific approach ensures that the results have a high level of accuracy and statistically represents the business community in South Stormont. From a statistical point-of-view, this sample results in a margin of error of approximately +/-10 with a confidence interval of 19 times out of 20.

This Report represents the findings of the survey exercise.

- Overall business satisfaction in South Stormont is strong at 90.1% with 66.3% very satisfied and 23.8% somewhat satisfied.
- 32.5% indicate their attitude to doing business in South Stormont is more positive than 12 months ago, compared to 13.8% indicating more negative; representing a net improvement of 18.7%.
- Businesses were asked to rate their satisfaction on 14 different factors affecting their business performance. Only one of these factors had a satisfaction level of less than 50% satisfaction.
- The factors with the lowest levels of satisfaction were “Availability of skilled labour”, “Availability of unskilled labour”, “Availability of funding programs for business and property improvement” and “Development/Building permit process”.
- When considering what factors are statistically most likely to lead to improved business satisfaction, the top priorities are “Availability of funding programs for business and property improvement”, Availability of skilled labour”, Availability of unskilled labour” and “Development/Building permit process”. Addressing these top priority business factors through review, adaptation, or sustained attention are most likely to lead to higher business satisfaction.

# Key Findings

# South Stormont Business Profile

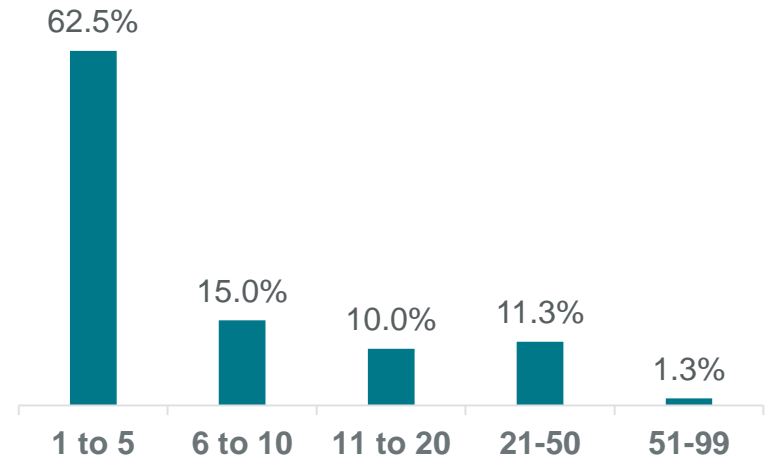

## Years Operating in South Stormont
